

# FINALLY ... A FLAWLESS AUTOMATIC SHUTOFF SCALE.

**Fill propane cylinders safely, accurately  
and automatically every single time.**

## **SCALETEC**

*By Superior Energy Systems*

**Easily convert any beam scale to an  
electronic, automatic shutoff scale system  
with ScaleTec.**

Don't waste time monitoring the filling process.  
With ScaleTec, you:

- Attach the hose to the cylinder.
- Set the scale set point.
- Let ScaleTec fill the cylinder precisely.
- Disconnect the hose after the system shuts off.

The scale beam moves while the cylinder is  
filling. Once the cylinder reaches its maximum  
permitted filling level, the scale beam breaks  
the beam of light and automatically stops the  
filling process.

***Simple, precise and foolproof.***
