SUPERIOR DESIGN, SUPERIOR QUALITY, SUPERIOR SERVICE  
Why settle for anything less?

## PRO-Vac 1000

Simply, safely and efficiently remove autogas from your fleet vehicles for service and maintenance.

The PRO-Vac 1000 propane autogas evacuation system removes liquid propane and vapor pressure, safely leaving the autogas tank ready for servicing.

### Transfers fuel from the vehicle fuel tank to:

- Another autogas vehicle
- A refueling station tank
- A separate LPG storage tank

### Additional Features:

- A sight flow gauge allows the visual of the transfer of propane during the operation.
- Designed for outside use.
- Completely air operated for safety (40 scfm @ 100 psi max)
- Allows trained operators to flare the tank in a controlled manner.
- No engine or electricity needed.
